

B1/M1 polyester textile for trade fairs, decorations, indoor and outdoor stage construction

Textiles

euromedia **TexUs Textile 190 FR**

High quality, light banner textile with top lie-flat properties for quality prints in solvent up to 3.1m wide! Graphics appear vibrant and high contrast on the matt white surface, which is totally non-reflective and therefore perfectly suited to applications in areas of extreme artificial lighting.

Unbeatably favourable price-performance ratio. Versatile in use, because TexUs Textile 190 FR is flame-retardant according to B1. Of particular interest, therefore, if you are producing for the European trade fair business. If you prefer to print a very bulky, heavy textile substrate but with the same printability and surface characteristics, we would be pleased to introduce you to TexUs Textile 280 FR!

Dimensions

190g - 1030mm(41') - 50m, PSI
 190g - 1370mm(54') - 50m, PSI
 190g - 2500mm(98') - 50m, PSI
 190g - 3100mm(122') - 50m, PSI

Product Code

70100098664
 70100098617
 70100098682
 70100098781

Hints & Tips

In many applications you can save yourself the trouble of hemming: by simply cutting to size using the euromedia heat cutter. The material `welds itself' at the edges in the process. Simple, clean, without fraying

euromedia TexUs Textile 190 FR

Product Properties

Applications

- indoor
- outdoor
- banners
- trade fairs

Properties

- OEKO-TEX
- PVC-Free
- fire classification B1
- backlit/translucent
- heat cutting
- cold cutting
- can be stitched

Processing Tips

We basically recommend that the print is left to dry out for 24 hours before finishing.

Storage

The product should be stored in its original packaging at a room temperature of 15°C - 25°C and 40 - 60% relative humidity.

Specifications

Material	Polyester
Ink	Solvent
Flame retardancy	B1
Gloss Level	Matt
Weight	190 g/m ²
