User Guide

Ink range plus colour number produce full product code. E.g. Yellow in Texopaque Classic OP = OP045

The colours shown in this Product Information sheet are simulations of the colours that can be achieved using Fujifilm Sericol products. While every effort has been made to ensure the accuracy of these simulations, no guarantee can be given regarding their accuracy and users should carry out tests to confirm suitability before starting a production run.

The information and recommendations contained in this Product Information sheet, as well as technical advice otherwise given by representatives of our Company, whether verbally or in writing, are based on our present knowledge and believed to be accurate. However, no guarantee regarding their accuracy is given as we cannot cover or anticipate every possible application of our products and because manufacturing methods, printing stocks and other materials vary. For the same reason our products are sold without warranty and on condition that users shall make their own tests to satisfy themselves that they will meet fully their particular requirements. Our policy of continuous product improvement might make some of the information contained in this Product Information sheet out of date and users are requested to ensure that they follow current recommendations.
