

Self-adhesive B1 textile for creative wall designs for removable positioning on wallpaper and other indoor surfaces

Textiles

euromedia StickyTex FR

euromedia StickyTex FR is a revolution in wall tattoos, photos, borders and large surface wall decorations, printed by solvent or UV-curing also perfectly suited to cutter plotters. Genuine polyester textile with a high quality, non-reflective surface. Extremely simple to apply without distorting and can be re-used many times without leaving a residue or damaging the application surface.

Natural, creamy white coating with an impressive textile structure. On top of that: saturated, brilliant print results with low ink consumption. Genuine, easy handling because StickyTex FR can be handled without any distortion despite its soft surface feel, and the weak initial adhesion makes perfect positioning child s play. But what if your customer has something else in mind? The graphics can be re-used over and over again depending on the surface and period of use. StickyTex FR may be both heat and cold cut without fear of fraying.

Dimensions

350g - 1000mm(39') - 30m
350g - 1524mm(60') - 30m

Product Code

70100098784
70100098723
