FUJIFILM

From a film producer to a global high tech corporation

Fujifilm's history dates back more than 80 years to 1934. While the company was first established with the aim of domestically producing photographic films, it soon began entering new domains including the medical and printing fields by building on its accumulated expertise. Fujifilm has worked to diversify its business and today is among the leaders in each of its businesses on the back of innovative technologies.

Today the group is active across the three broad fields of imaging solutions, which handle products including cameras and photographic film, information solutions, which provides equipment and materials to advanced medical, printing, liquid crystal display and related fields, and document solutions.

FUJIFILM – Facts and figures

Global turnover of about € 18 billion Euro
Research & development, production, marketing and service in
273 subsidiaries, number of employees: 79.235

Graphic Systems

Fujifilm's philosophy in the Graphic Arts business is to deliver advanced solutions to printers of all types to help them achieve success. These include plate production and pressroom solutions for traditional offset printing, digital presses for shorter run on-demand applications, screen and narrow web inks, and advanced inkjet printing solutions for wide-format, commercial and packaging applications, all complemented by a market-leading range of production software.

Large Format

In the LFP branch Fujifilm offers the complete package: innovative printing systems, high quality inks under the Sericol brand as well as a complete range of media and display systems for every application by euromedia. For over 14 years euromedia has provided a perfectly matched range of products, which merge seamlessly together to produce an impressive and unique complete system for your large format printing work.

RollUp Display

ROLLSCREEN STANDARD

NEW

Most reliable rollup at the best price – for price sensitive applications

The classical design of RollScreen Standard is highlighted by black endcaps on the sides of the cassette and the foot. RollScreen Standard provides a reliable mechanism, long-life spring and warp-resistant housing. The specially reinforced holder for the pole guarantees perfect stability.

The print is stuck on at the bottom and firmly clamped at the top. This makes it simple to transport the graphic by rolling it into the stand and unrolling for the next use. One packaging unit consists of six display stands, with each packed individually in a carry bag.

RollUp Display

ROLLSCREEN PURE

Robustly constructed rollup display stand for effective and stable presentation of your advertising messages.

The classical design of RollScreen Pure is just as impressive as its robust construction with a reliable mechanism, long-life spring and warp-resistant housing made of high quality aluminium. The specially reinforced holder for the rod as well as two feet guarantee perfect stability.

In addition to its quality and design RollScreen Pure is also impressively simple to handle and use: the print is stuck on at bottom and firmly clamped at the top. This makes it simple to transport the graphics by rolling them into the stand and unrolling for the next use.
Excellent finishing of the polished aluminium eliminates sharp edges. This product has been developed in association with the experts from euromedia and is exclusively available at euromedia.

ROLLSCREEN SINGLE

Ultimate best seller for fast, effective POS presentations

The perfect RollUp for effective POS presentations – assembled in ten seconds!
The presentation stays perfectly flat and the profiles are of high quality – perfect for every occasion.

The graphics are fixed to the aluminium profile at the top and to the spring-loaded media attachment below. The spring system keeps the graphics under tension and also draws them into the protective housing when taking down.

ROLLSCREEN DESIGN

A feast for the eyes! For those demanding jobs and a smart ambience: High quality rollup display in a sleek design.

The lower end of the digital print is fixed to the self-adhesive rail in the base of the rollup display, the upper end simply clamps into the clamping rail.

During transport the banner is safely „rolled away" inside the aluminium base. The movable wings in front of and behind the base allow you to alter its visual appearance.

ROLLSCREEN CURVE

NEW

Cost effective and reliable wide base rollup with elegant design.

RollScreen Curve is a wide base rollup with stylish and popular design. It provides a reliable mechanism and long-life spring. The special steel base makes the system extremely stable while saving costs.

The print is stuck on at the bottom and firmly clamped at the top. This makes it simple to transport the graphic by rolling it into the stand and unrolling for the next use. Each system is packed in a padded carry bag.

ROLLSCREEN GHOST

"Hidden Champion" – in a new look!

RollScreen Ghost is the ultimate in discreet display solutions. The whole casing as well as the clamping rail (below) and adhesive rail (above) are cleverly hidden. The graphics appear to be held in place by an "invisible hand".

Is your customer only interested in the pure graphics – not in anything that even slightly detracts from the optical effect or indicates the presence of a "display device"? RollScreen Ghost has been specially designed to meet this requirement. Available in both 85 as well as 120 cm widths, it is also versatile in application.

ROLLSCREEN VARIO II

The special thing about elegantly-shaped RollScreen Vario II is this: once you have purchased the complete system, all you need to do when changing graphics is to replace the cassette. Even if this has been installed by an expert, it's still simple for anyone to change it. Ideal for chain stores and shops that use seasonal or frequently changing advertising. The casing is coated with a special stoved lacquer, making it extremely scratch-resistant. Use it over and over again. You'll be looking after the environment and your wallet.

With a telescope bar up to 2.20 height. The standard heights are marked.

It comes with an adjustable base which provides secure support, including on uneven sur-faces. RollScreen Vario II has a clamping bar at top and is self-adhesive at the bottom.
To transport or store the graphics, simply roll them up into the cassette and pack the display securely in the padded carry bag supplied.

RollUp Display

ROLLSCREEN DOUBLE

Roll display for displaying two advertising messages

Digital prints are attached to a bar at the top and are kept taught by a spring inside the stand. Prints are rolled up inside the base for protection during transport. Attention: The digital print is a static component of the whole system. Final stability is only achieved once the system has been completely erected!

In a matter of seconds the small aluminium case is transformed into a professional display system. The banner is "rolled up" inside the stand for protection during transport. No tools are required for euromedia RollScreen Double, which can be erected in seconds and is easy to transport. In locations where the public are passing from different directions, we recommend that you use the RollScreen Double system for double-sided application.

LBANNER UNITY

Large area advertising with our innovative LBanner Unity systems! The magnets in the clamping bars at the top and bottom make it easy to create large, seamless and spectacular advertising displays, which are slim but extremely stable. The flat, narrow stand is scratch-resistant thanks to its special stoved lacquer coating.

The clamping bars are secured using additional screws, which allows a wide range of print materials such as display films, banners and textiles to be used. The graphics and stand are stored separately in the high quality carry bag to protect the print.

Info Stand

INFO STAND

1A for A1! Present changing advertising easily on two opposite sides of the Info Stand. Even changing the graphics daily is no problem.

A remarkable feature is the simple opening and closing mechanism for the clamping frame, which allows the graphics to be changed manually without the use of tools. A PVC film protects the digital print from dust, water and damage.

The folded Info Stand can be stored easily behind doors or in small spaces. This low-cost advertising stand is the ultimate customer magnet.

Illuminated display

LLUMIBOX

The modern LED lightbox solution in a quality flatscreen design. Its robust, smart design produces a fantastic advertising effect anywhere indoors with a range of sizes from A4-A1. Walls in use as professional advertising media – truly unusual in this impressive quality. An effective and striking method of carrying your advertising message to your target group.

An eyecatcher with an energy-saving effect: Thanks to the LED lamp system you save up to 70% of energy costs compared with conventional illuminants and the lamps last longer. The specially developed diffusion panel provides even better backlit properties. All in all the system requires very little effort: Simply place the graphics into the silver anodised clamping frame with its built-in on / off switch and replace the transparent protective film. Close the frame. It's done. Quick and easy to change the design, even for frequent promotion changes. You can also make your graphics look just as professional and smart by using the euromedia FixFrame, although without its own light source.

Dimensions	Print dimensions	Weight	Product code

Illuminated display

LLUMIBOX TFT

Special class of extra flat illuminated panel (20 mm thickness). The high quality LEDs have a very long life. 8 mm thick, engraved acrylic guarantees even and complete illumination of the whole surface.

The transparent and flexible polycarbonate film is UV resistant. The black, screen-printed mount of only 30 mm is held very discretely in position. The magnetic seal allows it to be partially or completely removed, which means a quick and easy change of information at any time. Other formats available are A3, A1, 700 mm x 500 mm and 1000 mm x 700 mm.

Dimensions	Print dimensions	Weight	Product code
