

Display film for indoor and short-term outdoor rollup display systems. Ideal suited to volume jobs using solvent and UV inks

Display Films

euromedia RollUp Film Standard

The 210 micron thick RollUp Film Standard has been designed for use in rollup display systems. The front of the polypropylene film has a special satin matt coating. The silver grey back prevents the print showing through.

Thanks to its high quality and extremely attractive price-performance ratio RollUp Film Standard is particularly suitable for the production of volume products used for short to medium-term applications. RollUp Film Standard is also available in a version for water-based pigmented inks. Do you need a high quality, totally scratch-resistant display film for demanding long-term use? If so, have a look at our euromedia RollUp Film Premium for solvent, latex and UV inks. Do you need a dimensionally stable rollup material for normal conditions and with low curl? If so, have a look at our euromedia RollUp Film Advanced.

Dimensions

210mic - 0914mm(36') - 30m
 210mic - 1067mm(42') - 30m
 210mic - 1524mm(60') - 30m

Product Code

70100099126
 70100099117
 70100099113

Hints & Tips

Thanks to the special satin matt coating a laminate is not required for many applications. However, for optimum protection, euromedia RollUp Film Standard may also be used in combination with euromedia laminates such as euromedia MonoLam

euromedia RollUp Film Standard

Product Properties

Applications

- indoor
- outdoor
- displays
- trade fairs

Properties

- PVC-Free
- Blockout
- tear-proof
- cold lamination

Storage

The product should be stored in its original packaging at a room temperature of 15°C - 25°C and 40 - 60% relative humidity.

Specifications

Material	Polypropylene
Ink	Solvent, Eco-Solvent, UV
Gloss Level	Satin matt
Back	Silver grey
Thickness	210 mic
Weight	170 g/m ²
